## Chapter 1. Add

### What Is Addition?

You will learn about the arithmetic process of addition.

Addition is the arithmetic operation of finding the sum of two quantities or numbers, or of adding one number to another.

An addition operation is usually indicated by the use of the plus sign (+).

### How to Add Numbers

Here are instructions for using the addition feature of the JPS Calculator app.

To successfully add numbers, you must be familiar with the arithmetic process of addition.

- 1. Enter the first number.
- 2. Choose the add (+) button.
- 3. Enter the second number.
- 4. Choose the equal (=) button.

The result of the addition is displayed.

You want to add 2 to 3. The equation looks like this: 2 + 3 = 5. You enter 2, press the plus button, enter 3, and press the equals button. The result 5 appears on the screen.

## Chapter 2. Subtract

### What Is Subtraction?

You will learn about the arithmetic process of subtraction.

Subtraction is the arithmetic operation of finding the difference between two quantities or numbers, or of taking a specified part from a whole.

A subtraction operation is usually indicated by the use of the minus sign (-).

### **How to Subtract Numbers**

Here are instructions for using the subtraction feature of the JPS Calculator app.

To successfully subtract numbers, you must be familiar with the arithmetic process of subtraction.

- 1. Enter the first number.
- 2. Choose the minus (-) button.
- 3. Enter the second number.
- 4. Choose the equal (=) button.

The result of the subtraction is displayed.

You want to subtract 2 from 3. The equation looks like this: 3 - 2 = 1. You enter 3, press the minus button, enter 2, and press the equals button. The result 1 appears on the screen.

## Chapter 3. Multiply

### What Is Multiplication?

You will learn about the arithmetic process of multiplication.

Multiplication is the arithmetic operation of finding the product of two quantities or numbers, or of multiplying one number by another.

A multiplication operation is usually indicated by the use of the times sign (X).

### How to Multiply Numbers

Here are instructions for using the multiplication feature of the JPS Calculator app.

To successfully multiply numbers, you must be familiar with the arithmetic process of multiplication.

- 1. Enter the first number.
- 2. Choose the multiply (X) button.
- 3. Enter the second number.
- 4. Choose the equal (=) button.

The result of the multiplication is displayed.

You want to multiply 2 by 3. The equation looks like this: 2 X 3 = 6. You enter 2, press the times button, enter 3, and press the equals button. The result 6 appears on the screen.

## Chapter 4. Divide

### What Is Division?

You will learn about the arithmetic process of division.

Division is the arithmetic operation of finding how many times one quantity is contained in another, or of dividing one number by another.

A division operation is usually indicated by the use of the divide sign  $(\div)$ .

### How to Divide Numbers

Here are instructions for using the division feature of the JPS Calculator app.

To successfully divide one number by another, you must be familiar with the arithmetic process of division.

- 1. Enter the first number.
- 2. Choose the divide (÷) button.
- 3. Enter the second number.
- 4. Choose the equal (=) button.

The result of the division is displayed.

You want to divide 6 by 2. The equation looks like this:  $6 \div 2 = 3$ . You enter 6, press the divide button, enter 2, and press the equals button. The result 3 appears on the screen.
